

A BOD STUDIO PRODUCT

Bod App

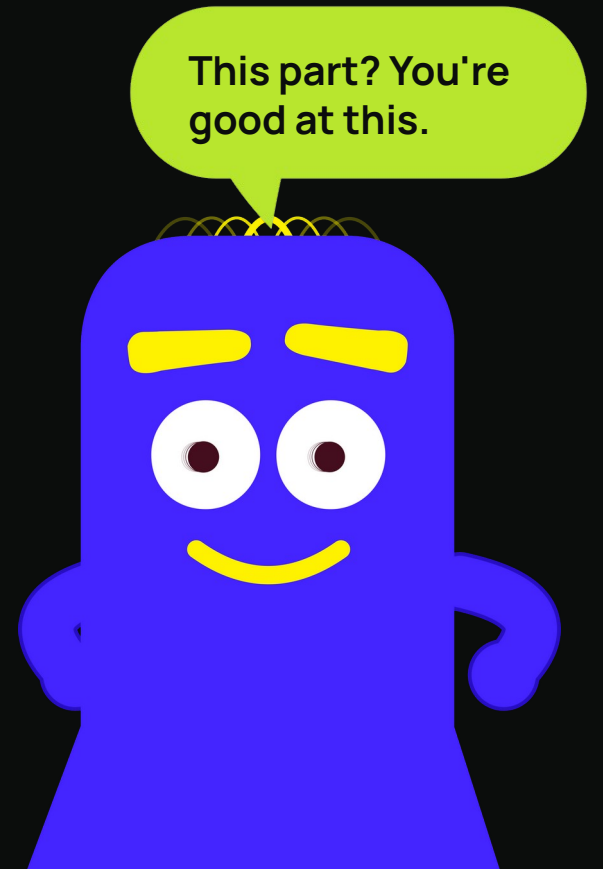

The task app for creative agencies.

It handles the admin, so your team can do the work.

We all love the work.

The ideas, the shoots, the late edits that finally click.

It's the rest of it.

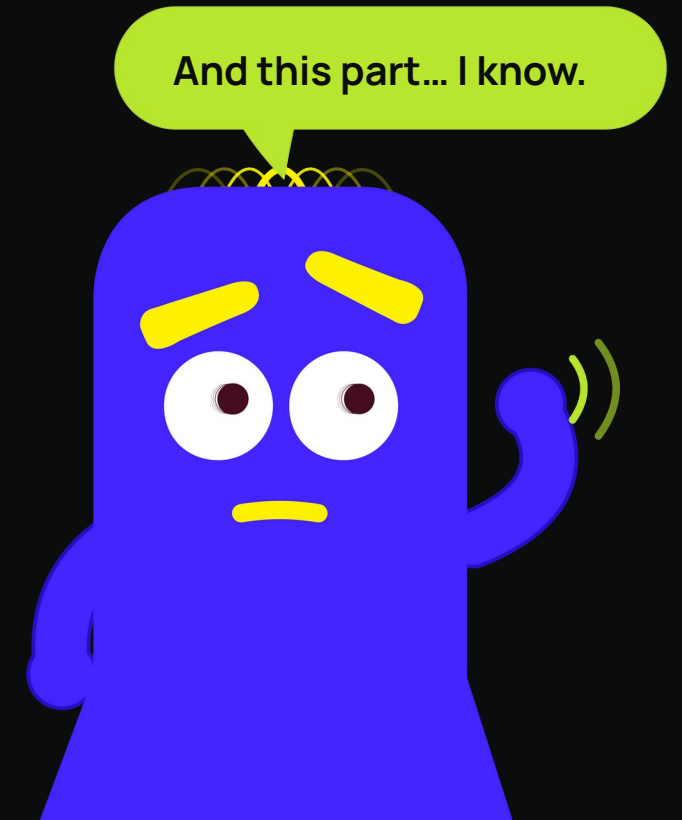

Updating the status, again.

Chasing a reply from the client.

“Where’s that file?”

The morning standup.

Working out what to bill.

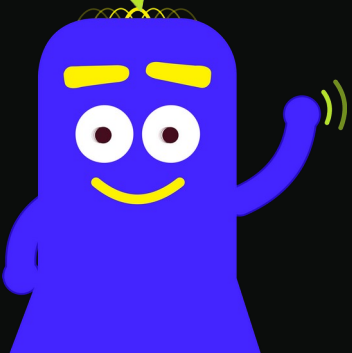

MEET BOD APP

So we built Bod App.

A task app that takes care of the rest.
Made for our own studio first.

I'm Bod Annan.
Leave the rest to me.

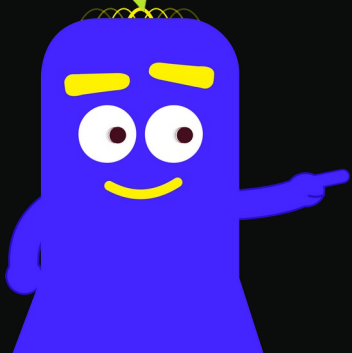

FOCUS QUEUE

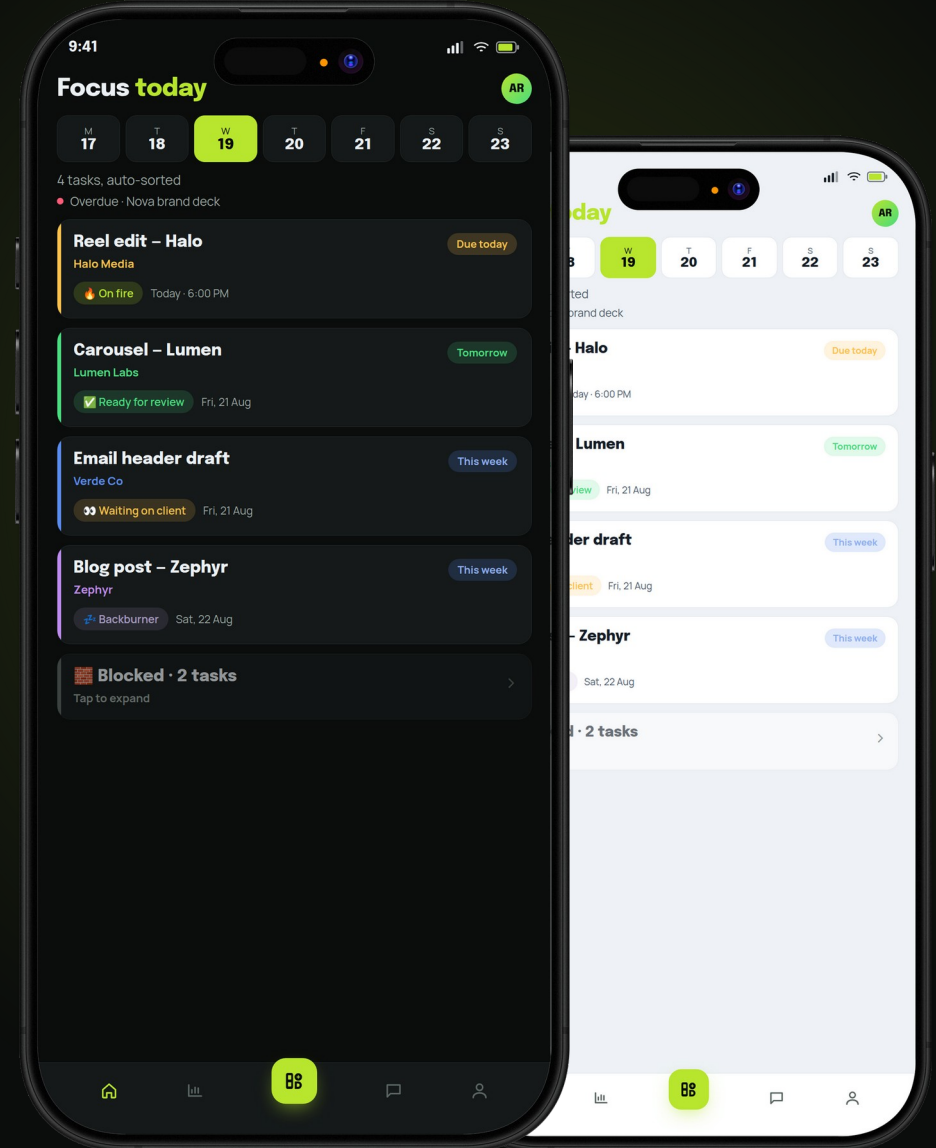

Your day, already sorted.

Overdue first, then what's due. Anything
stuck waits at the bottom.

Start with the
reel. It's due today.

AI CAPTURE

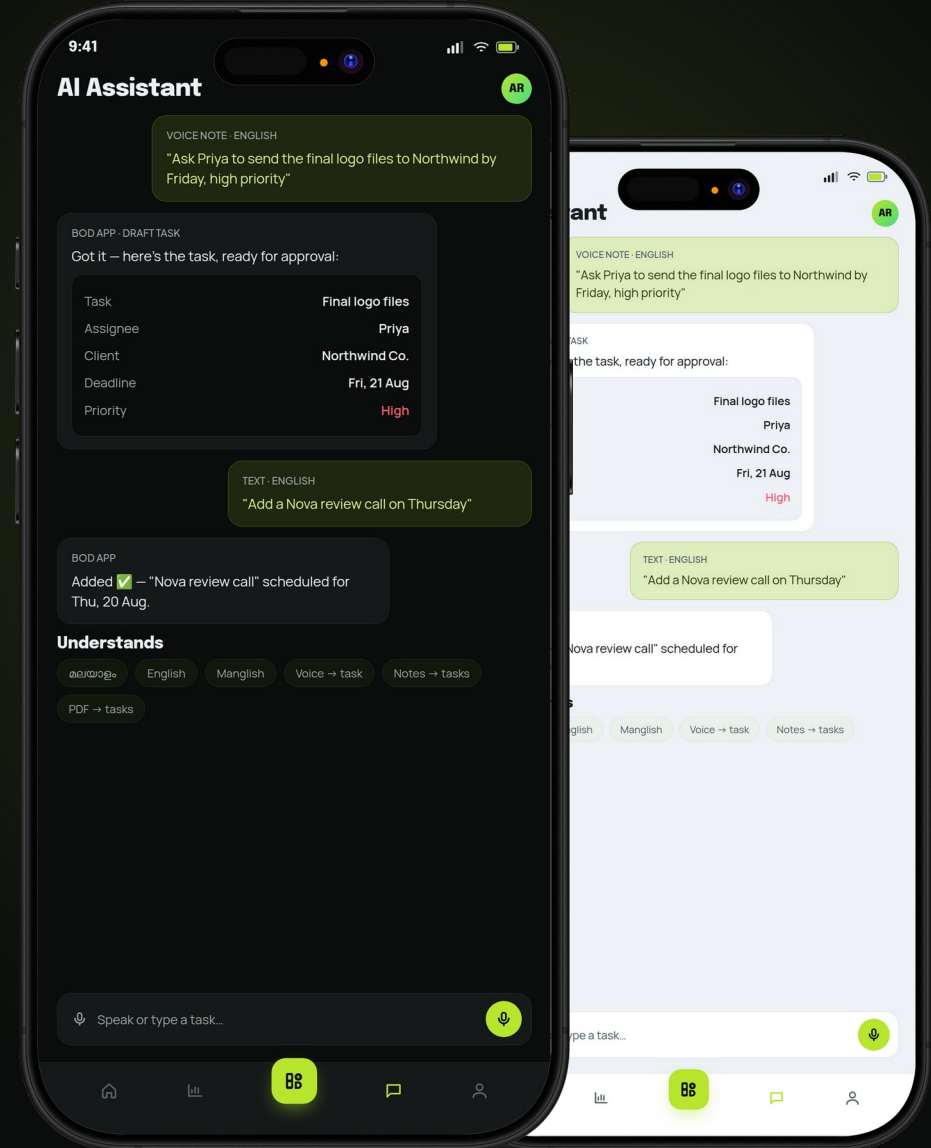

Just say what needs doing.

Say it or type it. It becomes a task, with who, what and when filled in.

Heard you. It's on Priya's list.

FOLLOW-UPS

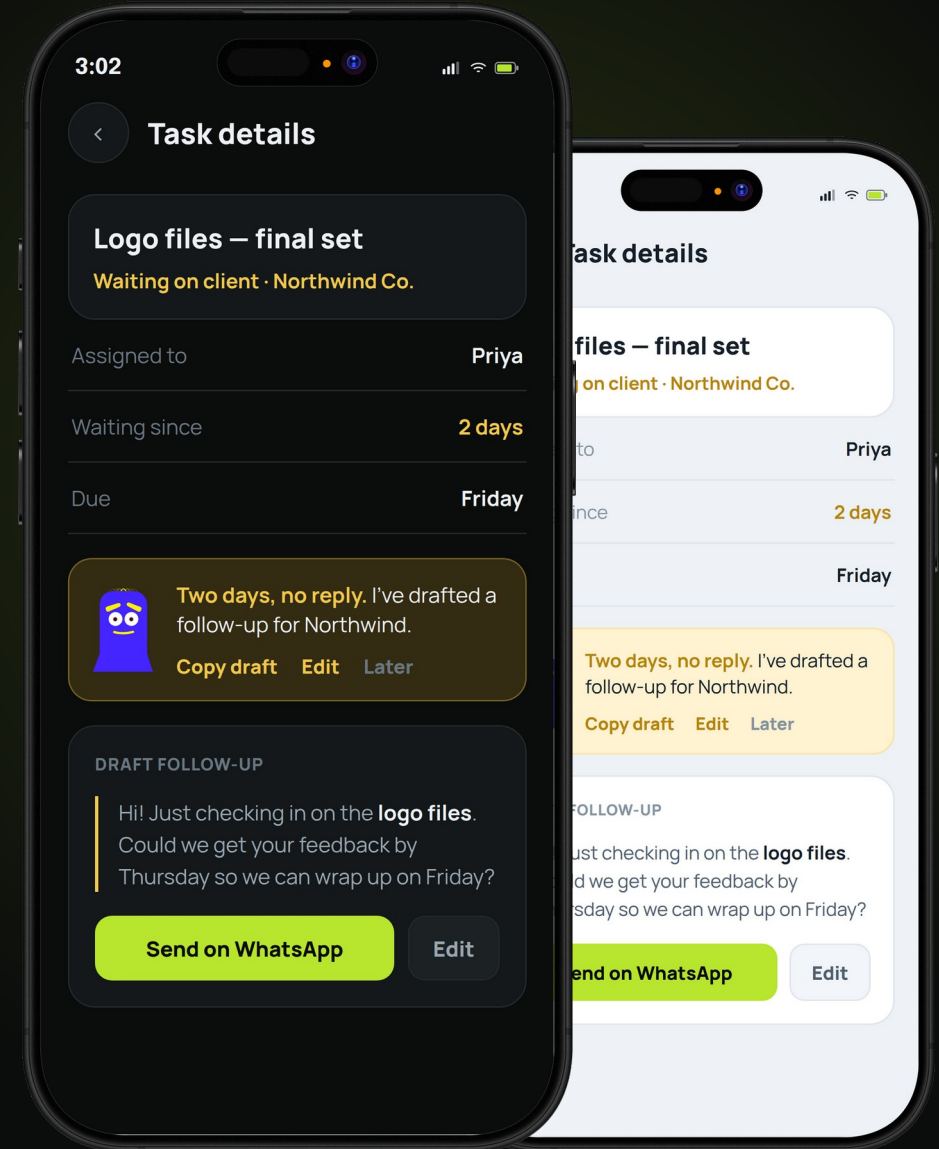

The client's gone quiet.

Bod App notices, and drafts the follow-up for you. You just send it.

No reply yet? I've written the follow-up for you.

STANDUP

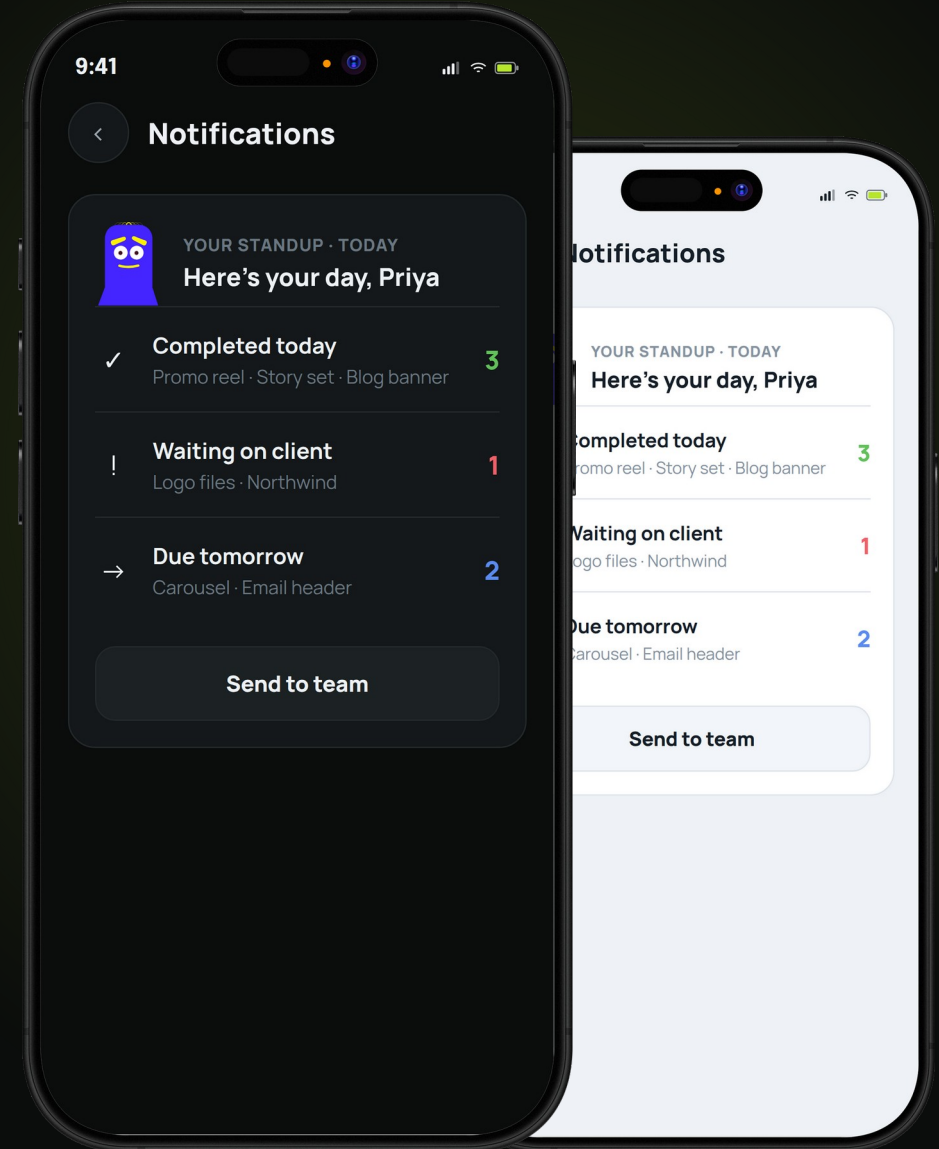

The standup writes itself.

What got done, what's moving and what's stuck. Read it, send it, go home.

Go home. I've got it from here.

WEEKLY WINS

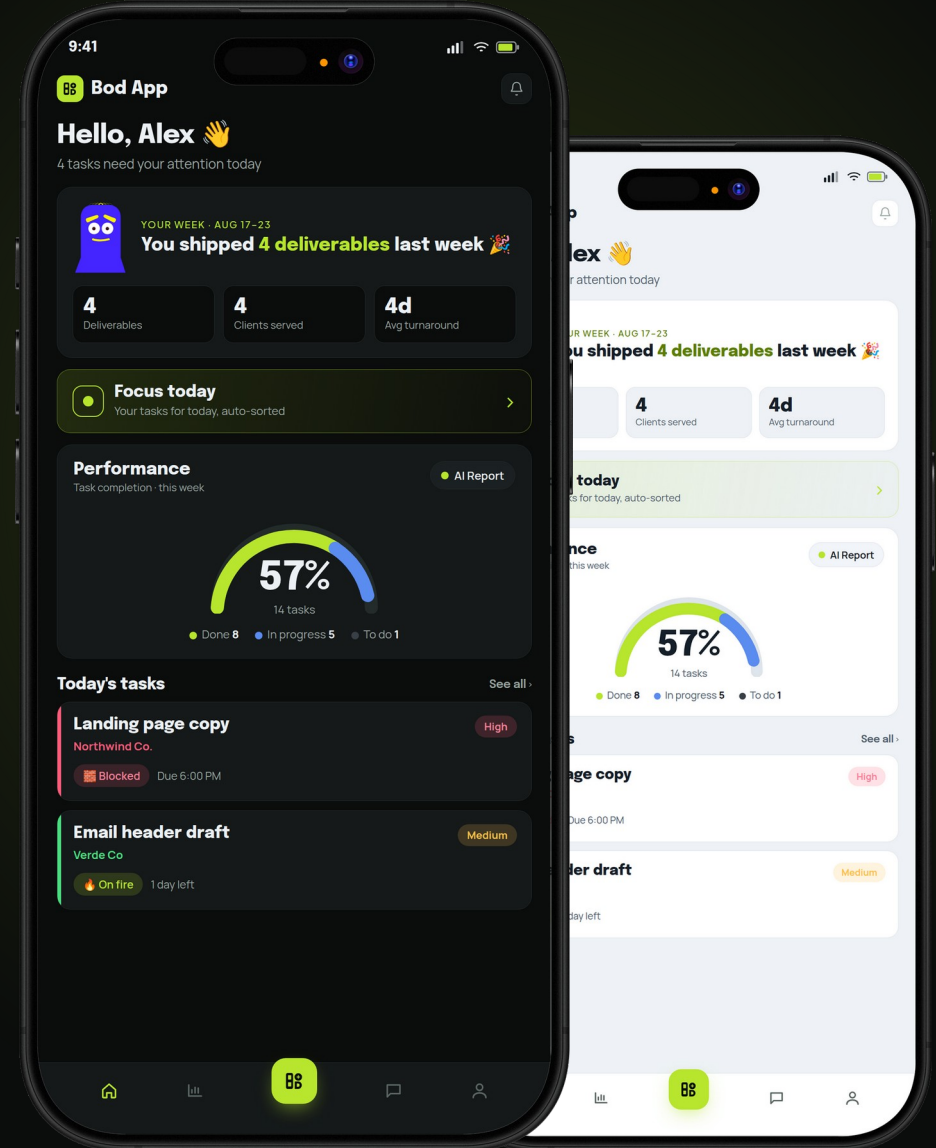

The week starts with a win.

Every week opens with what your team shipped, so good work gets noticed.

Four deliverables.
Proud of you lot.

The week feels lighter.

LESS OF

“Any update?”

“Just following up.”

“Who’s on this?”

MORE OF

The work itself.

Clear heads.

Leaving on time.

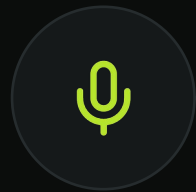

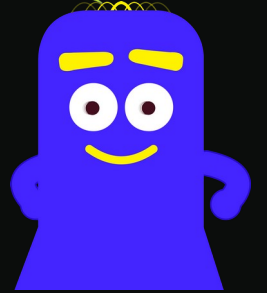

HOW IT WORKS

From brief to invoice.

Every job takes the same five steps.

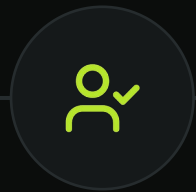

Every job, same path.
I watch every step.

STEP 1

Brief comes in

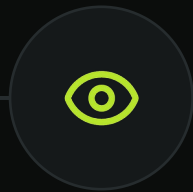

Say it, type it or drop the PDF.

STEP 2

Gets assigned

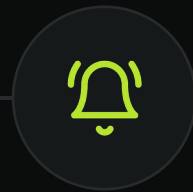

The PM approves it once.

STEP 3

Work happens

Everyone can see where it's at.

STEP 4

Client nudged

Gone quiet? It drafts the follow-up.

STEP 5

Billed

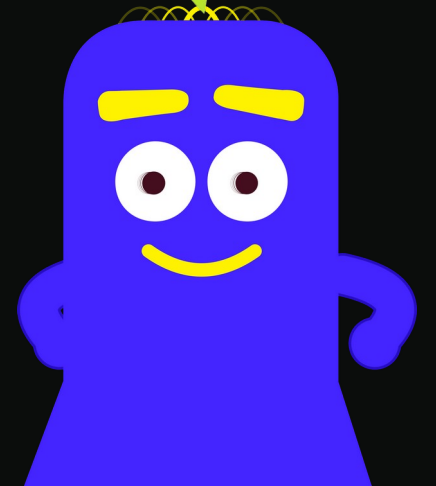

Done work goes straight to billing.

WHAT'S INSIDE

Everything in Bod App.

 Tasks and boards	 Focus Queue	 Voice to task	 Notes and PDFs to tasks
 Approvals	 Task vibes	 Client colours	 Follow-up nudges
 Team and task chat	 Daily AI summary	 "What's next?"	 Auto standup
 Weekly wins	 Analytics	 Ready to bill	 Leave and HR
 Google Sheets sync	 Roles and permissions	 Widgets and alerts	 iOS, Android and web

All of this. Quietly,
in the background.

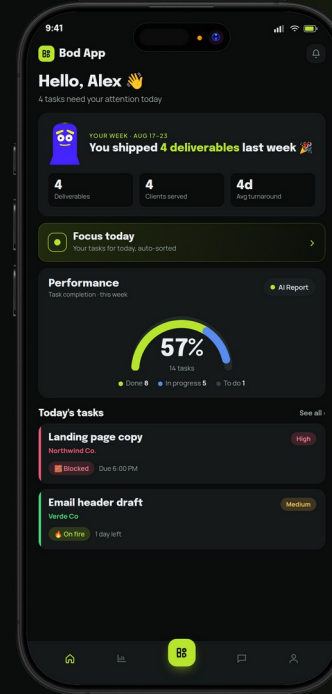

MADE FOR YOUR STUDIO
