

Bod App

A BOD STUDIO PRODUCT

PRODUCT SALES DECK · 2026

Stop juggling. Start shipping.

Run your whole studio from one calm app.

Tasks, approvals, billing prompts, standups and AI capture — one app instead of five. Built for marketing agencies and creative studios.

Email header draft

Medium

● 6 PM standup ready

day left

Your team isn't disorganised. Your tools are.

A busy studio's work lives in five places at once — so none of it can be tracked honestly.

WHERE THE WORK LIVES TODAY

 **WhatsApp** Briefs, approvals and follow-ups

 **Spreadsheets** The task list nobody updates

 **Email** Files, feedback and revisions

 **Memory** What's done and ready to bill

 **Meetings** The daily "where are we?"

Deadlines slip quietly

You hear about it when the client calls, not the day it happens.

Delivered work goes unbilled

Shipped deliverables fall through the gap between done and invoiced.

Founders fly blind

There's no honest read of where the week — or the team's capacity — went.

THE RESULT The project tool gets abandoned by month two, and the team goes back to chasing each other.

One calm app for the whole studio.

The workspace a marketing agency runs on: tasks, approvals, billing, AI capture and standups in one place. Built and battle-tested inside Storibod's own studio.

5→1

TOOLS, REPLACED

Tasks, approvals, billing prompts, standups and AI in one app.

3

LANGUAGES, SPOKEN

Capture work in Malayalam, English or Manglish — voice or text.

6 PM

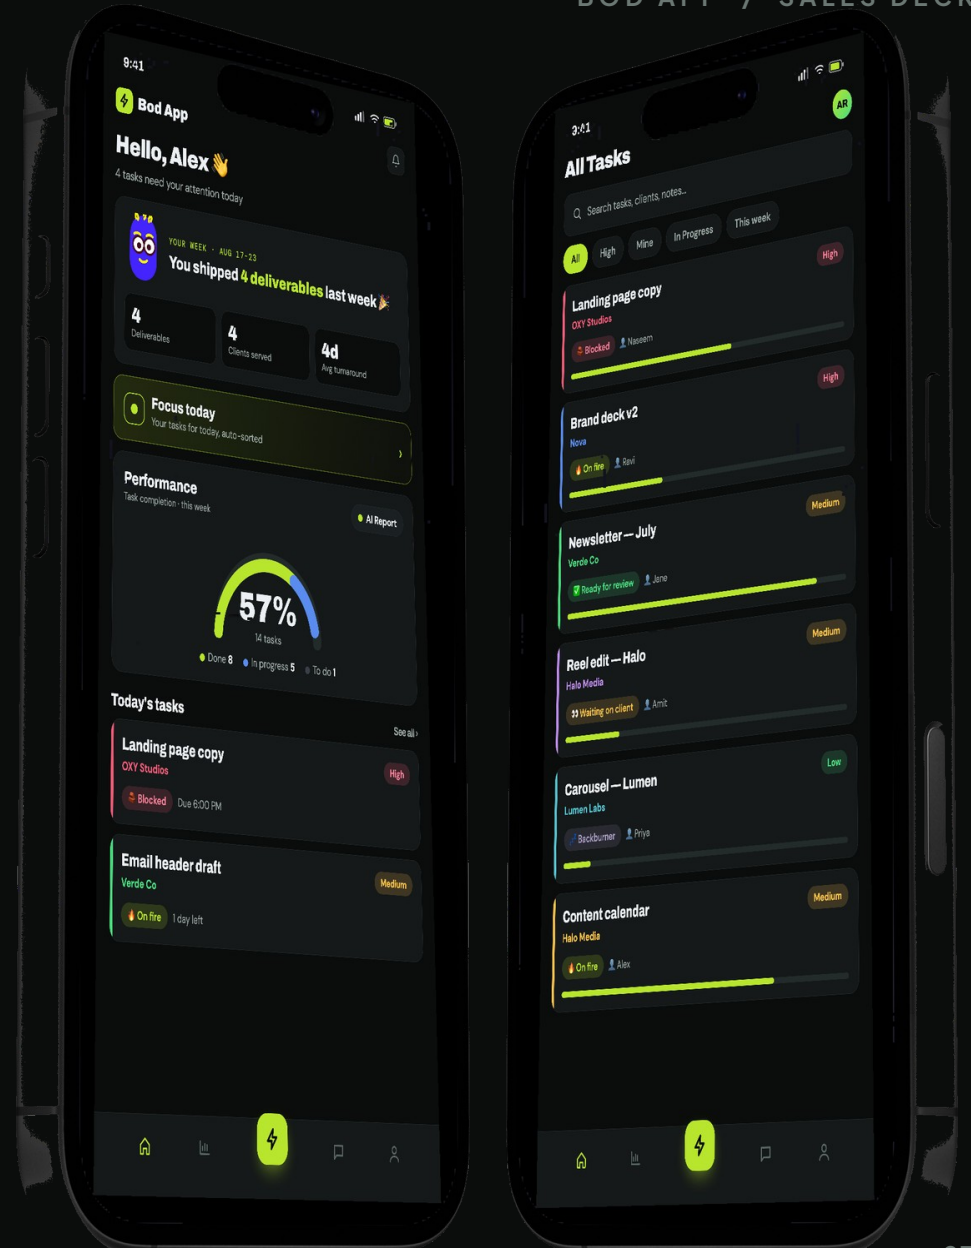

STANDUP, AUTOMATED

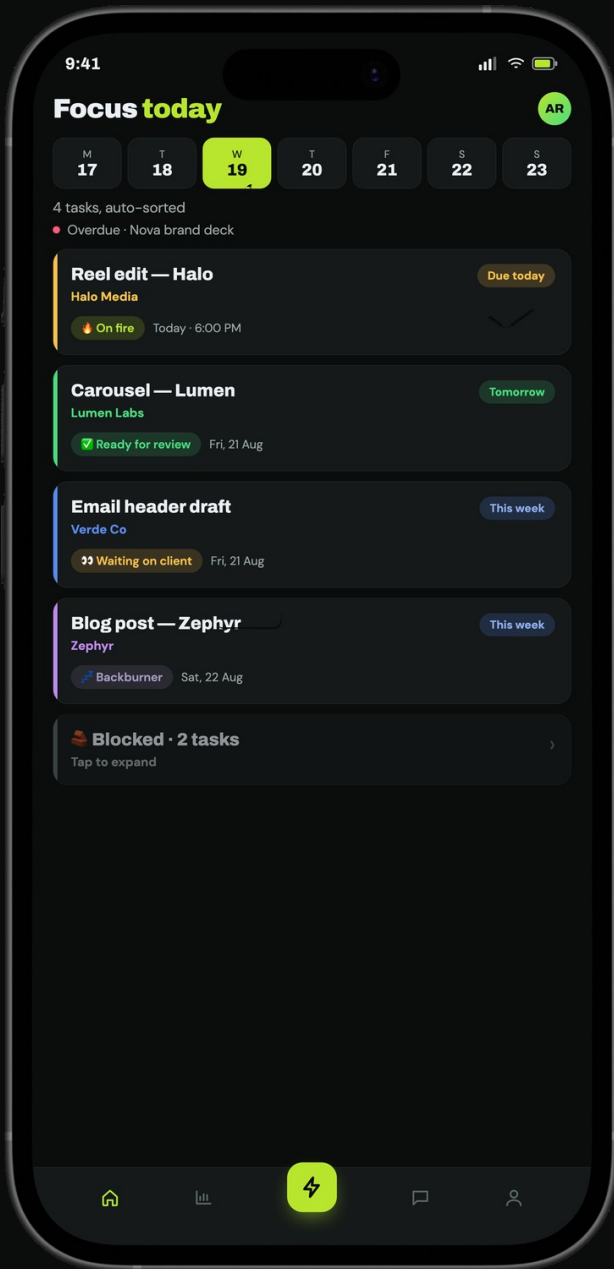

A daily digest of what shipped and what's next, written for you.

3

PLATFORMS, ONE APP

iOS, Android and web — at the desk or on a shoot, always in sync.

03 · SMART FOCUS QUEUE

Start every day already sorted.

Open the app and today is decided for you — overdue and blocked work first, the rest in the order that keeps clients happy. No planning meeting, no scrolling a board.

Overdue & blocked surfaced at the top

The queue is auto-sorted every morning, per person.

One tap into a calm focus mode

Just today's work — nothing else competing for attention.

Vibe status, so the team feels the load

Tap to set the mood of a task. Leads see pressure before it becomes a problem.

VIBE STATUS

On fire

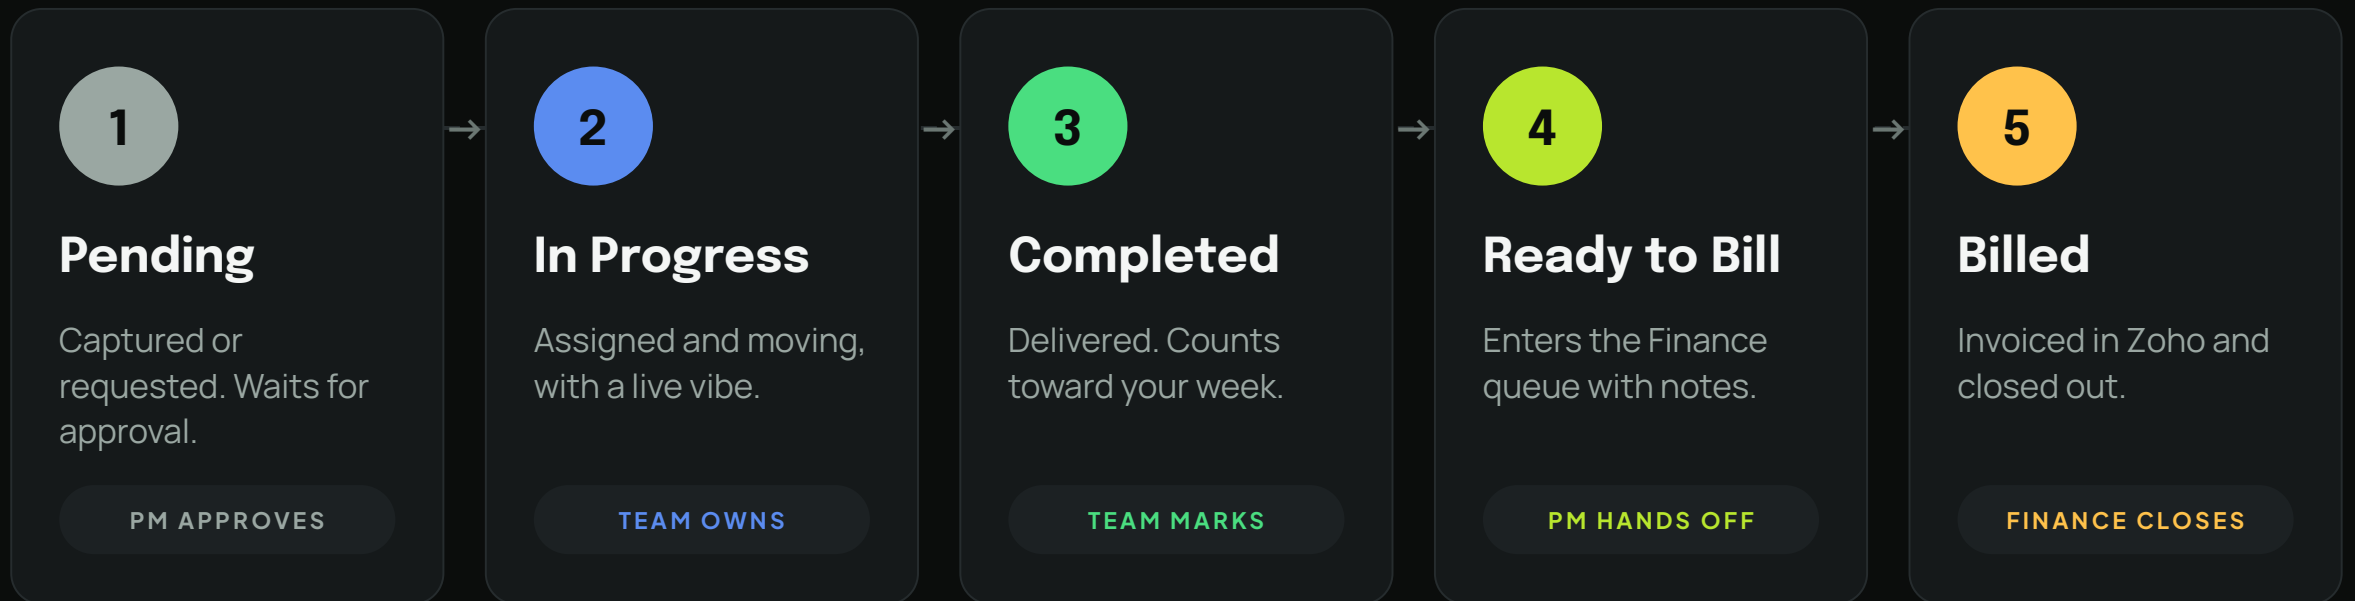

Waiting on client

Ready for review

Backburner

Brief to billed.

Five stages, role-aware at every step. Nothing shipped goes uninvoiced.

Role-gated at every step. People can only move work their role owns. Billed work is archived; cancelled work stays off-track.

No change to your accounting. Finance works a first-come Ready to Bill queue with an urgent-bill flag. Amounts stay in Zoho.

Speak it. It becomes a task.

A voice note or a messy line of notes turns into a clean, assigned task — the who, what and when already filled in. In the language your team actually speaks.

Malayalam

English

Manglish

Voice → task

PDF → tasks

- ✓ Assignee, deadline and priority parsed for you
- ✓ Lands in the PM approval queue, with duplicate detection
- ✓ Works from a voice note, rough notes or a PDF brief

YOU · VOICE NOTE · MANGLISH

“Naseem-inod OXY landing page copy Friday-il venam, high priority.”

BOD APP · DRAFT TASK

Here's the task, ready for approval:

Task	OXY landing page copy
Assignee	Naseem
Deadline	Friday
Priority	High

APPROVE

EDIT

See the whole studio at a glance.

Deliverables shipped, clients served, average turnaround — the numbers a founder actually asks for, without a single spreadsheet.

Output per client

Every client gets its own colour, so the workload split is obvious.

AI summaries

A daily briefing per person and a plain-English read of the week.

Auto standup at 6 PM

A daily digest of what shipped and what's next. One tap to copy.

Blocked-task nudges

48 hours waiting on a client? The follow-up is drafted for you.

Less juggling. More shipping.

Twelve features that replace a board, a sheet, a WhatsApp group and a standup meeting.

Focus Queue

One auto-sorted list for today, overdue first.

Task pipeline

Pending to Billed, role-aware at every step.

Vibe status

Long-press a task to set its mood.

AI capture

Voice or text in Malayalam, English, Manglish.

Client colours

Every client gets its own accent, everywhere.

Smart nudges

A follow-up drafted after 48h on a client.

Auto standup

A 6 PM digest, one tap to copy or post.

Billing checklist

What to bill, not how much. Zoho keeps the rest.

Approvals hub

Requests, notes and PDF tasks in one PM inbox.

Team & task chat

Group and per-task threads, files, voice notes.

What's next? AI

Ask which task to pick up next. Get a reason.

Home widgets

Your top tasks and AI briefing on the home screen.

One app, every seat.

Everyone sees the same work through their own lens — no status meetings required.

Founder

The whole studio at a glance — deliverables shipped, clients served, and what's ready to bill.

THEY LIVE IN

Analytics · AI weekly summary · 6 PM standup

Project manager

Assign, chase and approve from one inbox. Blocked-task nudges write the follow-up.

THEY LIVE IN

Approvals hub · Nudges · AI capture

Creative team

A calm focus queue — today's work, auto-sorted, with the vibe of each task at a tap.

THEY LIVE IN

Focus Queue · Vibe status · Focus mode

Finance & HR

A Ready to Bill queue and a “what to bill” checklist, so nothing shipped goes uninvoiced.

THEY LIVE IN

Ready to Bill · PM-Finance board · Leave & holidays

Same team. Different week.

From chasing status to seeing the work.

BEFORE BOD APP

- ✗ Briefs scattered across WhatsApp, email and memory
- ✗ Status known only by asking each person
- ✗ Blocked work waits until someone notices
- ✗ Delivered work slips through before it's billed
- ✗ The morning goes on a status meeting

WITH BOD APP

- ✓ Every brief captured once – by voice, in any language
- ✓ Status visible at a glance, with a live vibe
- ✓ Blocked-task nudges write the follow-up
- ✓ A Ready to Bill queue: nothing shipped goes uninvoiced
- ✓ A 6 PM standup digest, written for you

The bill for coordination nobody counts.

Illustration: 10 people · 22 working days · 30 minutes of coordination per person, per day.

30 min

PER PERSON / DAY

Chasing status, re-explaining briefs
and hunting for files.

110 hrs

PER MONTH

Lost across a ten-person team —
most of a full-time salary.

₹2,990

BOD APP ADVANCED / MONTH

The full setup for that same ten-
person team (10 seats × ₹299).

Run the arithmetic with your own team size and hourly cost. It rarely comes out close.

Simple per-seat plans.

14 days free. Full features. No card.

BASIC

₹199 / seat / mo

Small teams finding their rhythm.

The essentials, not every feature

- ✓ Full task pipeline & board
- ✓ Focus Queue & vibe status
- ✓ Per-client colour
- ✓ iOS, Android & web

ADVANCED

MOST POPULAR

₹299 / seat / mo

Growing agencies, many clients.

The full setup we run on ourselves

Everything in Basic, plus:

- ✓ AI capture: voice, notes, PDF
- ✓ Approvals hub & requests
- ✓ Nudges, standup & recap
- ✓ Billing checklist & analytics

PREMIUM

₹499 / seat / mo

Studios wanting a custom build.

Custom setup, configured with you

Everything in Advanced, plus:

- ✓ Custom pipeline, categories & roles
- ✓ Zoho & Sheets sync
- ✓ SSO & role controls
- ✓ Onboarding & priority support

Per seat, per month. Talk to us about annual billing and larger teams. · GCC clients can be billed in AED or SAR.

Built by a studio. Fits your stack.

Bod App was built to run the Storibod floor before it was offered to anyone else. Every feature earned its place on real client work.

BATTLE-TESTED ON WORK FOR

**OXY · Salison's · Restlon · Papacheri · Vijayan
Master's · Plum Stories**

A Bod Studio product

Built by Storibod Creatives in Kochi, Kerala. Support stays human — on WhatsApp.

PLAYS NICE WITH WHAT YOU USE

Zoho

Invoices & books

Google Sheets

Live task sync

WhatsApp

Nudges & demos

iOS

iPhone & iPad

Android

Phone & tablet

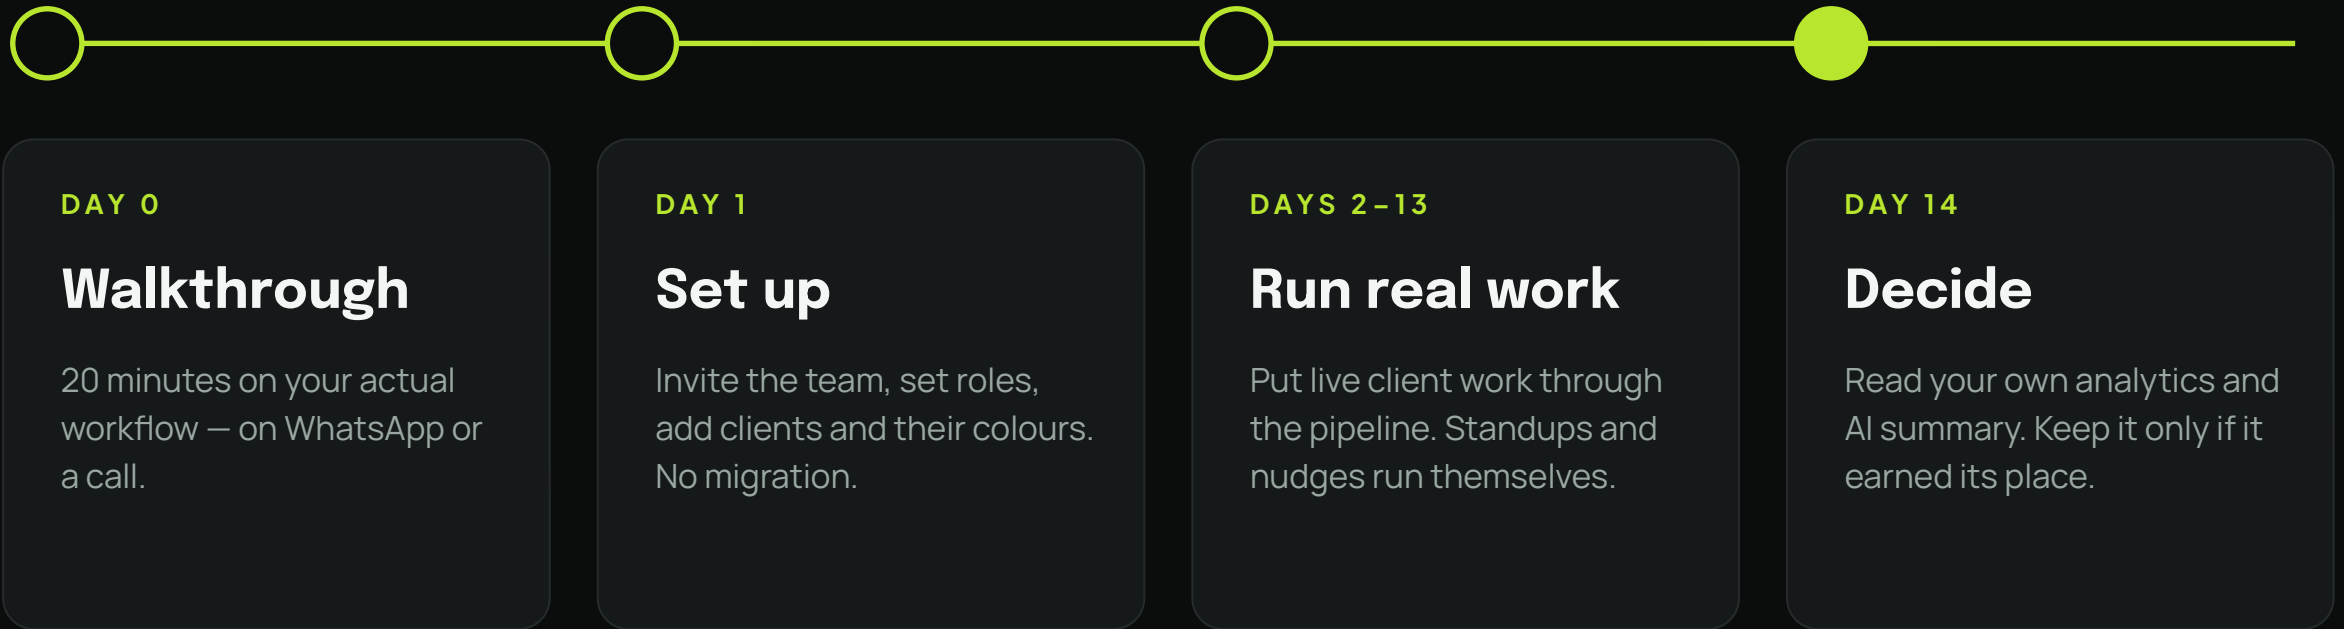

Web

Any browser

From first call to a decision in 14 days.

A real workflow, not a generic demo.

14 days, full features, no card. If it hasn't earned its place, walk away — there's no contract to unwind.

The questions you're already thinking.

Short answers. No jargon.

We already use WhatsApp.

WhatsApp is where work gets discussed, not tracked. Bod App gives the work a home — and still nudges on WhatsApp.

We tried a project tool. It died.

Usually because it demanded setup before it gave anything back. Bod App sorts your day from the first task you add.

Who has time to migrate?

There's nothing to migrate. Start with this week's tasks — or speak them in. History can stay where it is.

Does it replace our invoicing?

No. It runs a “what to bill” checklist and a Ready to Bill queue. Amounts and invoices stay in Zoho.

Is the AI really multilingual?

Yes — Malayalam, English or Manglish, by voice or text. It parses the who, what and when into a draft task.

Which devices?

iOS, Android and web from one codebase — with home-screen widgets on mobile and offline caching when the signal drops.

NEXT STEP

Run your studio the calm way.

Start the 14-day free trial, or book a 20-minute walkthrough on your real workflow. If it doesn't hold up, you've lost two weeks and no money.
